Pray!

William Woodford: William, an 11th grader, is healing after a significant concussion. On an average, high school athletes can take 10 - 14 days to recover. As an active young man, it may be difficult for him to avoid the activities that challenge brain recovery. These specifically include: watching television, reading, using a computer/tablet, video gaming, texting, listening to music on headphones, homework, using the telephone, and driving.

Debbie Dalton: Helen Fisher, Debbie's mother, is having lymphoma treatments throughout December. Pray for effectiveness and for Debbie as she is the primary caregiver, Debbie Dalton works in the elementary main office.

Iris Keys: Iris Keys, one of our board members, is recovering from hernia surgery.

Give it some
grace
Above all,
KEEP LOVING
one another earnestly,
for **LOVE COVERS** a
multitude of sins.
